

# **SAFETY DATA SHEET**

#### Wandabase 2435 Yellow Orange

### **Section 1. Identification**

GHS product identifier Other means of identification	:	Wandabase 2435 Yellow Orange
Relevant identified uses of the		Ibstance or mixture and uses advised against FOR INDUSTRIAL USE ONLY
Supplier/Manufacturer	:	Akzo Nobel Coatings, Inc. 1845 Maxwell Troy, MI, 48084 USA (800) 618-1010
Canadian Supplier	:	Akzo Nobel Coatings Ltd. 110 Woodbine Downs Blvd. Unit #4 Etobicoke, Ontario Canada M9W 5S6 +1 (800) 618-1010
Emergency telephone number	:	CHEMTREC +1 (800) 424-9300 (Inside the US) CHEMTREC International +1 (703) 527-3887 (Outside the US, collect calls accepted)
Date of issue / Date of revision Safety Data Sheet Version Date of printing	:	7 May 2020 20.08 7 May 2020

Akzo Nobel Coatings Inc. encourages and expects you to read and understand this entire MSDS, as there is important information throughout the document. Further, Akzo Nobel Coatings Inc. expects you to follow the precautions identified in this document unless your use conditions would necessitate other appropriate methods or actions.

To promote safe handling, each customer or recipient should: 1) Notify its employees, agents, contractors, and others whom it knows or believes will use this material of the information contained in this MSDS and any other information regarding hazards and safety; 2) Furnish this same information to each of its customers for the product; 3) Request its customers to notify their employees, customers, and other users of the product of this information; and 4) Notify its employees, agents, contractors, and others that the precautions identified for this product and any other products with which mixtures may be created are transferable and cumulative to the mixture.

### Section 2. Hazards identification

OSHA/HCS status	: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Classification of the substance or mixture	: FLAMMABLE LIQUIDS - Category 2 SKIN IRRITATION - Category 2 EYE IRRITATION - Category 2A CARCINOGENICITY - Category 2

#### **GHS label elements**

For additional information call the Akzo Nobel Car Refinishes Techline at 1-800-618-1010.

Wandabase 2435 Yellow Orange

Section 2. Hazards identification

Page: 2/16

Hazard pictograms	
Signal word	: Danger
Hazard statements	<ul> <li>Highly flammable liquid and vapor.</li> <li>Causes serious eye irritation.</li> <li>Causes skin irritation.</li> <li>Suspected of causing cancer.</li> </ul>
Precautionary statements	
Prevention	: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves. Wear eye or face protection. Wear protective clothing. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating, lighting and all material-handling equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Ground/bond container and receiving equipment. Keep container tightly closed. Wash hands thoroughly after handling.
Response	: IF exposed or concerned: Get medical attention. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing and wash it before reuse. If skin irritation occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.
Storage	: Store locked up. Store in a well-ventilated place. Keep cool.
Disposal	: Dispose of contents and container in accordance with all local, regional, national and international regulations.
Hazards not otherwise classified	: None known.

## Section 3. Composition/information on ingredients

Substance/mixture

: Mixture

Ingredient name	%	CAS number
n-butyl acetate	50 - 55	123-86-4
xylene	10 - 15	1330-20-7
Cellulose nitrate	5 - 10	9004-70-0
Alkyd resin, based on coconut oil	5 - 10	-
ethylbenzene	1 - 5	100-41-4
Isopropyl alcohol	1 - 5	67-63-0
Solvent naphtha (petroleum), light arom.	1 - 5	64742-95-6
2-butoxyethanol	1 - 5	111-76-2
ethyl acetate	1 - 5	141-78-6

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

For additional information call the Akzo Nobel Car Refinishes Techline at 1-800-618-1010.

### Section 4. First aid measures

Description of necessary first aid measures

Eye contact	<ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.</li> </ul>
Inhalation	<ul> <li>Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.</li> </ul>
Skin contact	: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Ingestion	: Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

#### Most important symptoms/effects, acute and delayed

Potential acute health	effects
Eye contact	: Causes serious eye irritation.
Inhalation	: No known significant effects or critical hazards.
Skin contact	: Causes skin irritation.
Ingestion	: No known significant effects or critical hazards.
Over-exposure signs/s	symptoms
Eye contact	: Adverse symptoms may include the following: pain or irritation watering redness
Inhalation	: No specific data.
Skin contact	: Adverse symptoms may include the following: irritation redness
Ingestion	: No specific data.
Indication of immediate	medical attention and special treatment needed, if necessary
Notes to physician	: In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Specific treatments : No specific treatment.

For additional information call the Akzo Nobel Car Refinishes Techline at 1-800-618-1010.

### Section 4. First aid measures

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

LAUINGUISIIING INCUID	Exting	uishing	media
-----------------------	--------	---------	-------

Extinguishing media	
Suitable extinguishing media	: Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.
Unsuitable extinguishing media	: Do not use water jet.
Specific hazards arising from the chemical	Highly flammable liquid and vapor. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard.
Hazardous thermal decomposition products	<ul> <li>Decomposition products may include the following materials: carbon dioxide carbon monoxide nitrogen oxides halogenated compounds</li> </ul>
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

### Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders	: If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Environmental precautions	: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

#### Methods and materials for containment and cleaning up

For additional information call the Akzo Nobel Car Refinishes Techline at 1-800-618-1010.

### Section 6. Accidental release measures

Small spill	: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

### Section 7. Handling and storage

Precautions for safe handling	1	
Protective measures	:	Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.
Advice on general occupational hygiene	:	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	:	Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well- ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

# Section 8. Exposure controls/personal protection

Control parameters

**Occupational exposure limits** 

For additional information call the Akzo Nobel Car Refinishes Techline at 1-800-618-1010.

Page: 6/16

# Section 8. Exposure controls/personal protection

Ingredient name	Exposure limits		
n-butyl acetate	ACGIH TLV (United States, 3/2015). STEL: 200 ppm 15 minutes. TWA: 150 ppm 8 hours. NIOSH REL (United States, 10/2013). STEL: 950 mg/m <sup>3</sup> 15 minutes. STEL: 200 ppm 15 minutes. TWA: 710 mg/m <sup>3</sup> 10 hours. TWA: 150 ppm 10 hours. OSHA PEL (United States, 2/2013). TWA: 710 mg/m <sup>3</sup> 8 hours. TWA: 150 ppm 8 hours.		
xylene	ACGIH TLV (United States, 3/2015). STEL: 651 mg/m <sup>3</sup> 15 minutes. STEL: 150 ppm 15 minutes. TWA: 434 mg/m <sup>3</sup> 8 hours. TWA: 100 ppm 8 hours. OSHA PEL (United States, 2/2013). TWA: 435 mg/m <sup>3</sup> 8 hours. TWA: 100 ppm 8 hours.		
Cellulose nitrate Alkyd resin, based on coconut oil ethylbenzene	None. None. ACGIH TLV (United States, 3/2015). TWA: 20 ppm 8 hours. NIOSH REL (United States, 10/2013). STEL: 545 mg/m <sup>3</sup> 15 minutes. STEL: 125 ppm 15 minutes. TWA: 435 mg/m <sup>3</sup> 10 hours. TWA: 435 mg/m <sup>3</sup> 10 hours. OSHA PEL (United States, 2/2013). TWA: 435 mg/m <sup>3</sup> 8 hours. TWA: 100 ppm 8 hours.		
Isopropyl alcohol	ACGIH TLV (United States, 3/2015). STEL: 400 ppm 15 minutes. TWA: 200 ppm 8 hours. NIOSH REL (United States, 10/2013). STEL: 1225 mg/m <sup>3</sup> 15 minutes. STEL: 500 ppm 15 minutes. TWA: 980 mg/m <sup>3</sup> 10 hours. TWA: 400 ppm 10 hours. OSHA PEL (United States, 2/2013). TWA: 980 mg/m <sup>3</sup> 8 hours. TWA: 400 ppm 8 hours.		
Solvent naphtha (petroleum), light arom. 2-butoxyethanol	None. ACGIH TLV (United States, 3/2015). TWA: 20 ppm 8 hours. NIOSH REL (United States, 10/2013). Absorbed through skin. TWA: 24 mg/m <sup>3</sup> 10 hours. TWA: 5 ppm 10 hours. OSHA PEL (United States, 2/2013).		

For additional information call the Akzo Nobel Car Refinishes Techline at 1-800-618-1010.

Page: 7/16

	Absorbed through skin.	
	TWA: 240 mg/m <sup>3</sup> 8 hours.	
	TWA: 50 ppm 8 hours.	
ethyl acetate	ACGIH TLV (United States	
	TWA: 1440 mg/m <sup>3</sup> 8 hours	S.
	TWA: 400 ppm 8 hours. NIOSH REL (United State	c 10/2012)
	TWA: 1400 mg/m <sup>3</sup> 10 hou	
	TWA: 400 ppm 10 hours.	
	OSHA PEL (United States	s, 2/2013).
	TWA: 1400 mg/m <sup>3</sup> 8 hour	S.
	TWA: 400 ppm 8 hours.	
Appropriate engineering	: Use only with adequate ventilation. Use process enclosures, local e	
controls	or other engineering controls to keep worker exposure to airborne or	
	any recommended or statutory limits. The engineering controls also vapor or dust concentrations below any lower explosive limits. Use	
	ventilation equipment.	
Environmental exposure	: Emissions from ventilation or work process equipment should be ch	ecked to ensure
ontrols	they comply with the requirements of environmental protection legisl	
	cases, fume scrubbers, filters or engineering modifications to the pro-	
	will be necessary to reduce emissions to acceptable levels.	
ndividual protection meas		
Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical	
	eating, smoking and using the lavatory and at the end of the working	
	Appropriate techniques should be used to remove potentially contar Wash contaminated clothing before reusing. Ensure that eyewash	
	showers are close to the workstation location.	
Eye/face protection	: Safety eyewear complying with an approved standard should be use	ed when a risk
	assessment indicates this is necessary to avoid exposure to liquid s	plashes, mists,
	gases or dusts. If contact is possible, the following protection shoul	
	the assessment indicates a higher degree of protection: chemical s	plash goggles.
Skin protection		
Hand protection	: Chemical-resistant, impervious gloves complying with an approved	
	worn at all times when handling chemical products if a risk assessm	
	necessary. Considering the parameters specified by the glove man during use that the gloves are still retaining their protective propertie	
	noted that the time to breakthrough for any glove material may be di	
	glove manufacturers. In the case of mixtures, consisting of several	
	protection time of the gloves cannot be accurately estimated.	
Body protection	: Personal protective equipment for the body should be selected base	
	performed and the risks involved and should be approved by a spec	
	handling this product. When there is a risk of ignition from static ele static protective clothing. For the greatest protection from static disc	
	should include anti-static overalls, boots and gloves.	narges, ciouning
Other skin protection	<ul> <li>Appropriate footwear and any additional skin protection measures s</li> </ul>	hould be colorted
Other skin protection	<ul> <li>Appropriate footwear and any additional skin protection measures s based on the task being performed and the risks involved and shoul</li> </ul>

Page: 8/16

### Section 8. Exposure controls/personal protection

**Respiratory protection** : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

### **Section 9. Physical and chemical properties**

Appearance						
Physical state	:	Liquid.				
Color	:	Not ava	ailable.			
Odor	:	Not ava	ailable.			
Odor threshold	:	Not ava	ailable.			
рН	:	Not ava	ailable.			
Melting/freezing point	:	Not ava	ailable.			
Boiling point	:	77°C (	170.6°F)			
boiling range	:	Not ava	ailable.			
Flash point	:	Closed	d cup: 13°C	C (55.4	4°F)	
Evaporation rate	:	Not av	ailable.			
Flammability (solid, gas)	:	Not av	ailable.			
Upper/lower flammability or ex	plo	osive lin	nits			
			termined.			
Lower:	:	Not de	termined.			
Vapor pressure	:	Not av	ailable.			
Vapor density	:	Not av	ailable.			
Relative density	:	0.954				
Density	:	7.96	lbs/gal	0.9	954 g	J/cm³
Solubility	:	Not av	ailable.			
Solubility in water	:	Not av	ailable.			
Partition coefficient: n- octanol/water	:	Not av	ailable.			
Auto-ignition temperature	:	Not av	ailable.			
Decomposition temperature	:	Not av	ailable.			
Viscosity	:	Kinema	atic (room	tempe	eratur	re): 4.19 cm²/s (419 cSt)
Weight Volatiles	:	72.96%	6 (w/w)			
Volume Volatiles	:	78.67	%(v/v)			
Weight Solids	:	27.04	%(w/w)			
Volume Solids	:	21.33	%(v/v)			
Regulatory VOC	:	5.8	lbs/gal	695	g/l	minus water and exempt solvents
VOC Actual	:	5.8	lbs/gal	693	g/l	

For additional information call the Akzo Nobel Car Refinishes Techline at 1-800-618-1010.

Section 10. Stability and reactivity				
Reactivity	: No specific test data related to reactivity available for this product or its ingredients.			
Chemical stability	: The product is stable.			
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.			
Conditions to avoid	: Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition.			
Incompatible materials	: Reactive or incompatible with the following materials: oxidizing materials			
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

	Acute LC50 40000 µg/l Marine water	Crustaceans - Cancer magister - Zoea	48 hours
	Acute LC50 4200 µg/l Fresh water	Fish - Oncorhynchus mykiss	96 hours
Isopropyl alcohol	Acute LC50 1400000 to 1950000 µg/l Marine water	Crustaceans - Crangon crangon	48 hours
	Acute LC50 4200 mg/l Fresh water	Fish - Rasbora heteromorpha	96 hours
2-butoxyethanol	Acute EC50 >1000 mg/l Fresh water	Daphnia - Daphnia magna	48 hours
	Acute LC50 800000 to 1000000 µg/l Marine water	Crustaceans - Crangon crangon	48 hours
	Acute LC50 1250000 µg/l Marine water	Fish - Menidia beryllina	96 hours
ethyl acetate	Acute EC50 2500000 µg/l Fresh water	Algae - Selenastrum sp.	96 hours
-	Acute LC50 750000 µg/l Fresh water	Crustaceans - Gammarus pulex	48 hours
	Acute LC50 154000 µg/l Fresh water	Daphnia - Daphnia cucullata	48 hours
	Acute LC50 212500 to 225420 µg/l Fresh water	Fish - Heteropneustes fossilis	96 hours
	Chronic NOEC 2400 µg/l Fresh water	Daphnia - Daphnia magna	21 days
	Chronic NOEC 75.6 mg/l Fresh water	Fish - Pimephales promelas - Embryo	32 days

#### Persistence and degradability

Not available.

#### Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.

### Section 16. Other information

Copyright ©2001, National Fire Protection Association, Quincy, MA 02269. This warning system is intended to be interpreted and applied only by properly trained individuals to identify fire, health and reactivity hazards of chemicals. The user is referred to certain limited number of chemicals with recommended classifications in NFPA 49 and NFPA 325, which would be used as a guideline only. Whether the chemicals are classified by NFPA or not, anyone using the 704 systems to classify chemicals does so at their own risk.
